

Fresh Product

Peripheral Blood Plasma, Hepatitis C Virus

Catalog#	PBPL005F-HCV	5 mL
	PBPL010F-HCV	10 mL

Product Description

Human Peripheral Blood Plasma is collected from hepatitis C virus (HCV) patients in 5 mL tubes containing EDTA.

Plasma was obtained using Institutional Review Board (IRB) approved consent forms and protocols.

Sample Collection and Processing

All samples are collected on-site at our Stem Cell Collection Center. Samples are quickly processed at our on-site laboratory to achieve maximum viability and quality.

Format

Fresh peripheral blood plasma is shipped at ambient temperature.

Storage

Fresh products should be used or processed immediately upon receipt. The warranty only covers items whose specifications are tested at the time they are received.

Warning

This product contains human tissue or other biological material and MUST be handled at Biosafety Level 2 or higher. All biological products should be treated as potentially infectious or contaminated material, even if infectious disease screening reports are negative. Follow universal precautions and wear appropriate personal protective equipment.

Product Warranty

For our product warranty, please review our Terms and Conditions at stemexpress.com/terms-and-conditions/.

FOR IN VITRO RESEARCH USE ONLY. NOT APPROVED FOR HUMAN OR VETERINARY USE IN VIVO.
